Sunny good news!

We've just heard that recently the Carrum Downs Holiday Park installed a massive number of solar panels on their holiday accommodation buildings. They started the project in mid 2013, and managed to get the 230 solar panels fitted just in time for the Christmas holidays.

This will make a huge difference to their electricity bills and can only be a good thing for the environment. This clean source of energy will allow a reduction of 58 tonnes of greenhouse gas emissions every year.

Caravan Parks of Australia is proud to be offering an eco-friendly accommodation option to visitors to the Greater Frankston area and we applaud them for this great initiative.

If you are interested in staying informed about Council's Community Solar Program, where you can learn more about how to choose a solar system for your home, let us know at environment@frankston.vic.gov.au and we will keep you up to date with what's happening.

You can also visit [our website](#) for links to a range of solar resources including the Clean Energy Council Consumer Guide that tells you everything you need to know including government incentives.
